

# Portfolio Audit

Hey there! I am currently in the process of making a portfolio and would love as much feedback as you can provide. This is just a 10 min short survey with two sections on what improvements I can make to this current build. If you have any other major suggestions or critiques, there will be a section for you to enter them there.

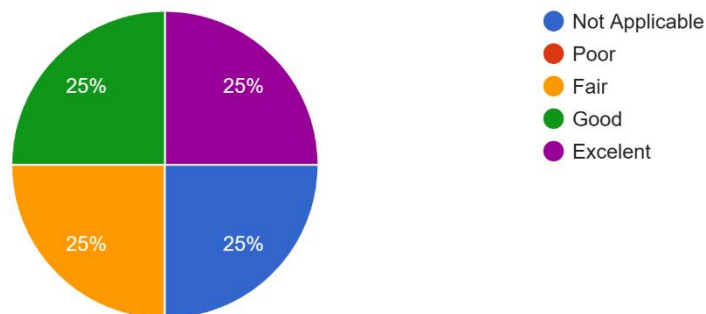

If you are able to, please review the website before answering any of the questions.

Here is the link to the current build:

[Portfolio website \(sensational-begonia-ed4e45.netlify.app\)](https://sensational-begonia-ed4e45.netlify.app)

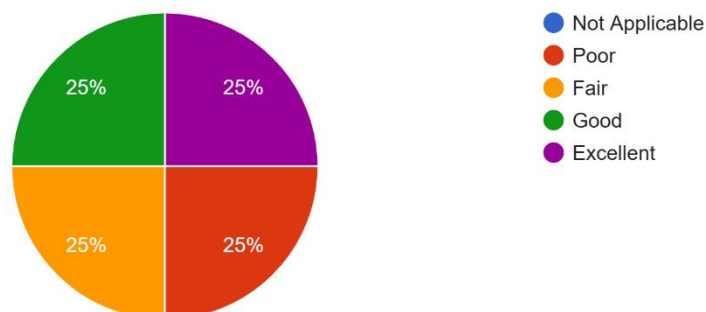

Looks very well put together, professional in appearance

What was your overall first impression of the website?

4 responses

great

Good overall, could use some improvement, but I enjoyed the color pallet.

Overall good, a bit light of a color scheme but I think that's because of how much websites use dark mode.

Impressed with color choice, and I do enjoy the nifty elements on the landing page, gives a good impression of styling.

Did you have any technical difficulties as you navigated through the pages and displayed the projects?

4 responses

yes

Just make sure all buttons work

Buttons and footer need to be fixed.

I think your buttons might be broken or linked to the wrong page. The footer linked to the top of the page, and I doubt that was on purpose.

What do you feel are the most effective design elements of this web portfolio?

4 responses

all of em

I really enjoyed the layout

I enjoy the side nav bar and the button hover effects.

I very much liked the flipping cards, maybe include a few more or something to make it a bit more engaging. I like your banners; they are used effectively.

What would you suggest be changed with the design or content of this web portfolio?

4 responses

yes

Fix buttons and navigation

Fix buttons, check grammar and spelling, and I think a few of your images didn't work as intended and might be reason why the website was so bright. Otherwise, great job!

I think the overall design was fine. Buttons obviously need to be fixed, but first builds never go as they intended. I think you may want to work on responsiveness but otherwise a good overall site.
